Aanmaak borduurkaart à € 65,- (per logo)

Instelkosten bij een eventuele herhaalorder € 28,- i.p.v. € 65,-

\*Prijzen voor bedrukking zijn op aanvraag.

Na ontvangst van het logo en de gewenste aantallen kunnen wij hiervoor een prijsberekening maken

Deze producten bevatten duurzame artikelen met bepaalde certificaties.

Het gecertificeerde artikel is onschadelijk voor de menselijke gezondheid.  
Elke draad, knop en accessoire is getest op een lijst van meer dan 1.000 schadelijke stoffen.  
Hoe intensiever het huidcontact, des te strenger de eisen op het gebied van menselijke ecologie en laboratoriumtests.  
Wij hanteren wereldwijd gestandaardiseerde testcriteria.  
De certificering voldoet aan internationale eisen en regelgeving.  
Wij herzien onze limietwaarden voor schadelijke stoffen minstens één keer per jaar.

*Spun-dyed* betekent dat de kleurstoffen al tijdens het productieproces van de vezels worden toegevoegd, in plaats van dat het textiel achteraf wordt geleverd. Dit heeft verschillende voordelen:

- Duurzamer – Er wordt minder water, energie en chemicaliën verbruikt in vergelijking met traditionele verfmethoden.
- Kleurecht – De kleur is dieper in de vezel verankerd, waardoor deze minder snel vervaagt door wassen of zonlicht.
- Efficiënter – Het productieproces is sneller en milieuvriendelijker, omdat er geen aparte verffase nodig is. Er wordt 30% minder water gebruikt.

Onze ISO 9001-certificering laat zien dat we voldoen aan de internationale normen voor kwaliteitsmanagementsystemen.

Dit betekent dat we:

- Consistente kwaliteit leveren in onze producten en diensten.
- Continue verbetering nastreven in al onze processen.
- Klanttevredenheid hoog in het vaandel hebben staan door te voldoen aan hun eisen en verwachtingen.

Met de ISO 14001-certificering bevestigen we onze betrokkenheid bij milieubeheer en duurzaamheid. Deze certificering houdt in dat we:

- Systematisch milieueffecten identificeren en verminderen.
- Voldoen aan wettelijke milieueisen en andere relevante verplichtingen.
- Onze milieuprestaties continu verbeteren door middel van doeltreffende milieubeheersystemen.

Textet Workwear is ook gecertificeerd volgens de Global Organic Textile Standard (GOTS). Deze certificering toont aan dat:

- Onze biologische textielproducten voldoen aan de hoogste normen op het gebied van milieu en sociale verantwoordelijkheid.
- Het gehele productieproces, van de oogst van de grondstoffen tot milieuvriendelijke en sociaal verantwoorde productie en warehousing, streng gecontroleerd wordt.
- Onze producten vrij zijn van schadelijke stoffen en chemische residuen, wat zorgt voor veilige en duurzame textielopties.

De Organic Content Standard (OCS) is een internationale, vrijwillige standaard die verificatie van de toeleveringsketen biedt voor materialen afkomstig van een boerderij die gecertificeerd is volgens erkende nationale biologische normen. De standaard wordt gebruikt om biologisch geteelde grondstoffen te verifiëren, van de boerderij tot het eindproduct.

Sorona® Aura-vezel is een eco-efficiënte prestatievezel. Het is gedeeltelijk op plantaardige basis en kan worden gerecycled via reguliere polyester-recyclingstromen. Sorona® Aura is een hoogwaardig materiaal dat lichtgewicht, ademend en warmte-isulerende eigenschappen biedt. De belangrijkste voordelen voor consumenten zijn zichtbaar gedurende de levensduur van de kleding, aangezien op Sorona gebaseerde stoffen een hoog niveau van elasticiteit, vormbehoud en kleurechtheid behouden, was na was.

SUGENRO®

Sugenro® is een gerecycleerde thermische isolatievulling. De GRS-gecertificeerde Sugeno®-vezel is gemaakt van gerecycled polyester en biedt een vulling die warmte en ademend vermogen garandeert, terwijl het tegelijkertijd milieuvriendelijk is.

Dons wordt algemeen beschouwd als de beste isolator, en bij Nimbus streven we ernaar hoogwaardige, toonaangevende materialen aan te bieden. Donzen veren zijn zowel biologisch afbreekbaar als recyclebaar, en door ervoor te zorgen dat onze leveranciers garanderen dat er geen levend plukken plaatsvindt, ondersteunen we het ethische aspect van het gebruik van dons.

BIONIC  
FINISH® ECO

BIONIC-FINISH® ECO vertegenwoordigt een ecologische technologie met unieke, niet-gehalogeneerde, APEO-vrije en fluorvrije formuleringen voor een permanente waterafstotende afwerking. Deze milieuvriendelijke waterafstotende impregnatie biedt diverse consumentvriendelijke voordelen, zoals het afstoten van water en waterige vuildeeltjes, wasbaarheid en geschiktheid voor alle vezeltypen. Het heeft als extra voordeel dat het geen negatieve invloed heeft op de ademende eigenschappen, geen gefluoreerde verbindingen bevat en vrij is van formaldehyde.

BIONIC-FINISH® – Geregistreerd handelsmerk van RUDOLF GmbH.

SPANO  
SUPER NO-IRON

Voor onze strijkvrije overhemden gebruiken we de Spano "Advanced Cotton" technologie. In plaats van conventionele methoden, waarbij een chemische stof op het eindproduct wordt aangebracht, hebben we gekozen voor de Inside Cross Linking-technologie. Deze methode beïnvloedt de kern van de textielvezels van binnenuit. Dit resulteert in stoffen en strijkvrije overhemden met een uitzonderlijk hoog herstelvermogen en gegarandeerde gladheid na elke wasbeurt.

HEIQ  
FRESH AIR

HeiQ Fresh is een reeks zilvervrije geurcontroletextieltechnologieën met ingrediënten die ofwel biologisch of mineraal gebaseerd zijn. HeiQ Fresh-producten bestrijden effectief ongewenste geuren op textiel door VOC's (Vluchtige Organische Stoffen of de "geurmoleculen") te absorberen. HeiQ Fresh is ingediend voor Bluesign-certificering, een keurmerk dat van toepassing is op chemicaliën, processen, materialen en producten en garandeert dat het veilig is voor het milieu, werknemers en consumenten.

amfori  
Trade with purpose

SMETA®

Nimbus is lid van *Amfori BSCI* en wij gebruiken *Amfori*- en *SMETA*-auditrapporten om veilige en eerlijke arbeidsomstandigheden en ethische bedrijfspraktijken te bevorderen en te verifiëren. Meer dan 90% van onze stijlen wordt geproduceerd in Amfori-geauditeerde fabrieken. Amfori- en SMETA-audits zorgen voor meer transparantie en geven vertrouwen dat we samenwerken met duurzame leveranciers.

Producten die gecertificeerd zijn volgens de Global Recycled Standard (GRS) bevatten gerecycled materiaal dat op elke fase van de toeleveringsketen is geverifieerd, van de bron tot het eindproduct. Daarnaast hebben de faciliteiten van de bron tot de uiteindelijke leverancier voldaan aan sociale, milieu- en chemische eisen.
